

AMENDED IN SENATE APRIL 7, 2011

SENATE BILL

No. 442

Introduced by Senator Calderon

February 16, 2011

An act to amend Section 1259 of the Health and Safety Code, relating to health facilities.

LEGISLATIVE COUNSEL'S DIGEST

SB 442, as amended, Calderon. Hospitals: interpreters.

Existing law establishes the State Department of Public Health and sets forth its powers and duties, including, but not limited to, the licensing and certification of health facilities, including, but not limited to, general acute care hospitals.

Existing law requires general acute care hospitals to, among other things, adopt and annually review its policy and procedures for providing assistance to patients with language or communication barriers to ensure access to health care information and services for limited-English-speaking or non-English-speaking residents and deaf residents. Existing law requires that the procedures ensure, to the extent possible, as determined by the hospital, that interpreters are available, either on the premises or accessible by telephone, 24 hours per day.

This bill would, in addition, require ~~a general acute care hospital to annually determine the 3 predominant non-English-speaking populations that it serves, assess the language assistance needs of those populations, and make available to serve those populations on the premises of the health facility 24 hours per day, at least one person who is qualified as an interpreter in each of those 3 languages~~ *the policy to include procedures for discussing with the patient any cultural, religious, or spiritual beliefs or practices of the patient that may influence care, and*

that the procedures be designed to increase hospital staff ability to understand and respond effectively to the cultural needs of patients.

Existing law requires hospitals to notify their employees of the hospital's commitment to provide interpreters to all patients who request them.

This bill would, in addition, require the hospital to notify employees of the hospital's commitment that the interpreter communicate information about the unique needs of the patient to the health care team.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: no.

The people of the State of California do enact as follows:

1 SECTION 1. Section 1259 of the Health and Safety Code is
2 amended to read:

3 1259. (a) The Legislature finds and declares that California
4 is becoming a land of people whose languages and cultures give
5 the state a global quality. The Legislature further finds and declares
6 that access to basic health care services is the right of every resident
7 of the state, and that access to information regarding basic health
8 care services is an essential element of that right.

9 Therefore, it is the intent of the Legislature that where language
10 or communication barriers exist between patients and the staff of
11 any general acute care hospital, arrangements shall be made for
12 interpreters or bilingual professional staff to ensure adequate and
13 speedy communication between patients and staff.

14 (b) As used in this section:

15 (1) "Interpreter" means a person fluent in English and in the
16 necessary second language, who can accurately speak, read, and
17 readily interpret the necessary second language, or a person who
18 can accurately sign and read sign language. Interpreters shall have
19 the ability to translate the names of body parts and to describe
20 competently symptoms and injuries in both languages. Interpreters
21 may include members of the medical or professional staff.

22 (2) "Language or communication barriers" means:

23 (A) With respect to spoken language, barriers which are
24 experienced by individuals who are limited-English-speaking or
25 non-English-speaking individuals who speak the same primary
26 language and who comprise at least 5 percent of the population of

1 the geographical area served by the hospital or of the actual patient
2 population of the hospital. In cases of dispute, the state department
3 shall determine, based on objective data, whether the 5 percent
4 population standard applies to a given hospital.

5 (B) With respect to sign language, barriers which are
6 experienced by individuals who are deaf and whose primary
7 language is sign language.

8 (c) To ensure access to health care information and services
9 for limited-English-speaking or non-English-speaking residents
10 and deaf residents, licensed general acute care hospitals shall:

11 (1) Review existing policies regarding interpreters for patients
12 with limited-English proficiency and for patients who are deaf,
13 including the availability of staff to act as interpreters.

14 (2) Adopt and review annually a policy for providing language
15 assistance services to patients with language or communication
16 barriers. The policy shall include procedures for providing, to the
17 extent possible, as determined by the hospital, the use of an
18 interpreter whenever a language or communication barrier exists,
19 except where the patient, after being informed of the availability
20 of the interpreter service, chooses to use a family member or friend
21 who volunteers to interpret. *The policy shall also include*
22 *procedures for discussing with the patient any cultural, religious,*
23 *or spiritual beliefs or practices of the patient that may influence*
24 *care.* The procedures shall be designed to *increase hospital staff*
25 *ability to understand and respond effectively to the cultural needs*
26 *of patients,* maximize efficient use of interpreters, and minimize
27 delays in providing interpreters to patients. The procedures shall
28 ensure, to the extent possible, as determined by the hospital, that
29 interpreters are available, either on the premises or accessible by
30 telephone, 24 hours per day. The hospital shall annually transmit
31 to the state department a copy of the updated policy and shall
32 include a description of its efforts to ensure ~~adequate effective~~ and
33 speedy communication between patients with language or
34 communication barriers and staff.

35 ~~(3) Annually determine the three predominant non-English~~
36 ~~speaking populations that it serves, assess the language assistance~~
37 ~~needs of those populations, and make available to serve those~~
38 ~~populations on the premises of the health facility, 24 hours per~~
39 ~~day, at least one person who is qualified as an interpreter in each~~
40 ~~of those three languages.~~

1 ~~(4)~~

2 (3) Develop, and post in conspicuous locations, notices that
3 advise patients and their families of the availability of interpreters,
4 the procedure for obtaining an interpreter and the telephone
5 numbers where complaints may be filed concerning interpreter
6 service problems, including, but not limited to, a T.D.D. number
7 for the hearing impaired. The notices shall be posted, at a
8 minimum, in the emergency room, the admitting area, the entrance,
9 and in outpatient areas. Notices shall inform patients that interpreter
10 services are available upon request, shall list the languages for
11 which interpreter services are available, shall instruct patients to
12 direct complaints regarding interpreter services to the state
13 department, and shall provide the local address and telephone
14 number of the state department, including, but not limited to, a
15 T.D.D. number for the hearing impaired.

16 (5) Identify and record a patient's primary language and dialect
17 on one or more of the following: patient medical chart, hospital
18 bracelet, bedside notice, or nursing card.

19 ~~(6)~~

20 (5) Prepare and maintain as needed a list of interpreters who
21 have been identified as proficient in sign language and in the
22 languages of the population of the geographical area serviced who
23 have the ability to translate the names of body parts, injuries, and
24 symptoms.

25 ~~(7)~~

26 (6) Notify employees of the hospital's commitment to provide
27 interpreters to all patients who request them *and that the interpreter*
28 *communicate information about the unique needs of the patient to*
29 *the health care team.*

30 ~~(8)~~

31 (7) Review all standardized written forms, waivers, documents,
32 and informational materials available to patients upon admission
33 to determine which to translate into languages other than English.

34 ~~(9)~~

35 (8) Consider providing its nonbilingual staff with standardized
36 picture and phrase sheets for use in routine communications with
37 patients who have language or communication barriers.

38 ~~(10)~~

- 1 (9) Consider developing community liaison groups to enable
- 2 the hospital and the limited-English-speaking and deaf communities
- 3 to ensure the adequacy of the interpreter services.
- 4 (d) Noncompliance with this section shall be reportable to
- 5 licensing authorities.
- 6 (e) Section 1290 shall not apply to this section.

O
